

Alexander König meets the new Federal President Frank-Walter Steinmeier and discusses the benefits of our robotic-assisted therapy system innovation.

26.04.2017

The new Federal President of Germany, **Frank-Walter Steinmeier**, and his wife had their "inaugural visit" to Bavaria. One of the main points of interest was to get insights into Bavaria´s vibrant start-up community.

During an event at the "Allerheiligen Hofkirche" in Munich, our CEO and Founder of Reactive Robotics GmbH had the opportunity to present a 3D Model of our robotic medical device innovation* to Mr Steinmeier, Minister-President Horst Seehofer, their wives and further guests.

They discussed the opportunities arising from automatized therapy via intelligent robotics for in the Intensive Care Units against the background of aging society.
